# Our Technology

## Drawing

- 1) Advanced equipment used on our factory enables us to use different types of engraving on tissues (See Image 1).
- 2) The light-reflecting and fluorescent elements printed on fabric cloth underline individuality of the team, and protect the product from fraud (See Image 2).
- 3) The combination of various materials with a laser treatment and embroidery opens up a wide range of opportunities for production of labels of any difficulty level and ensures excellence of quality (See Image 3).
- 4) Our printers are capable of portraying 16 000 000 colours with high resolution levels that enables us to achieve photographic quality of printing on tissues (See Image 4).
- 5) One of our unique selling point is a metallic fibers in the applications (See Image 5).
